

# 340B Complete™

## The comprehensive 340B solution that every safety-net provider should consider

Covered entities participating in the 340B program often struggle with the administrative burden and inventory control challenges inherent in the program. You need to maximize potential 340B pharmacy savings, control 340B management costs and establish the systems to ensure tight operational execution.

**Walgreens offers you our 340B Complete™ program — the most comprehensive suite of 340B services in the industry. You can count on unparalleled pharmacy and compliance expertise from your Walgreens 340B team, with a program structured to fit the specific needs of your organization and the constituents you serve — all with no upfront costs.**

## The solutions we deliver

Walgreens offers well-established, field-tested systems for safety net 340B providers. These essential systems provide inventory control to help prevent divergence and reporting capacity to demonstrate regulatory compliance.

- **Broad pharmacy access:** With 100+ years of pharmacy expertise and almost 8,000 points of care in our network, Walgreens offers unparalleled pharmacy services in locations near where your constituents live and work.
- **Experienced account management:** Your Walgreens 340B team is specially trained to support you, starting with a full implementation process. We'll support your daily operations, trending, and billing to help with compliance and reporting.
- **Superior technology:** Our electronic accumulator shows you a complete audit trail and eliminates any drug diversion. Through our client portal, you see a complete pathway for all prescriptions to help ensure compliance.

## Experience the Walgreens 340B advantage

With Walgreens working as your single source of 340B services, your organization experiences a range of benefits:

- You'll pay **no upfront drug costs** to implement your 340B program with Walgreens.
- Walgreens comprehensive solution **helps you streamline vendor relationships, maximize efficiencies and reduce consultation fees.**
- You and your constituents experience unmatched access through Walgreens **8,500 points of care.**
- Our extensive third-party payer contracts **help you maximize revenue generation.**

# 340B Complete™

## A robust, field-tested platform for your 340B needs

Technology is at the center of Walgreens 340B Complete services. Our system accumulates data from sold prescriptions — those tied to an activity — rather than adjudicated claims. The result is full tracking for all prescriptions and a superior system for helping to ensure government compliance. We also employ an electronic data interchange to the wholesaler in a closed system without human involvement, reducing errors and enhancing compliance.

Through Walgreens 340B Complete, you gain built-in advantages:

- Patient eligibility control
- 340B benefit design flexibility
- A replenishment model that eliminates upfront costs for your organization
- Comprehensive reporting on all prescription and provider activity available through our client portal
- Detailed reports for all medication replenishment ordering and receiving
- Exclusive documentation to meet all compliance needs and avoid costly 340B penalties

At Walgreens, we're working across the entire healthcare landscape to find better ways to deliver better care, and our 340B Complete solution demonstrates that commitment. When you work with Walgreens, your constituents will gain unmatched access, and you'll gain a knowledgeable 340B team employing superior technology to deliver superior results.
